DETAILED ACTION

Election/Restriction

Applicant having canceled all pending claims and submitted new claims all directed to a single amine compound, the previous election/restriction requirement is hereby withdrawn. All pending claims will be examined (claims 237-258).

Claim Objections

Claim 252 is objected to because of the following informalities: claim 252 depends from itself. The examiner respectfully suggests that claim 252 should properly depend from claim 251. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 256 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim recites the limitation "neutral lipid." There is insufficient antecedent basis for this limitation in the claim. The examiner respectfully suggests that the phrase "neutral lipid" be deleted and substituted with the phrase "lipid aggregate."

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 237-258 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over at least claims 32, 101, 104, 107, 109, 117, 118 and 121 of copending (now allowed) Application No. 09/438,365. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant compound, compositions and methods are but a subset of the compounds, compositions and methods taught by the parent. Case law seems clear on this point: Where a reference describes a sufficiently limited genus of a number of closely related compounds (see claim 32), the reference may be said to provide a description of those compounds just as if they were identified in the reference by name. *In re Schaumann*, 572 F.2d 312, 197 USPQ 5 (CCPA 1978); *In re Petering*, 301 F.2d 676, 133 USPQ 275 (CCPA 1962) (a vast number of permutations of substituent groups under a general formula was reduced to twenty compounds by recourse to "preferences" disclosed in the reference).

Art Unit: 1621

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 253, 254, 257 and 258 are included in this rejection as they are either intrinsic to the prior art, or merely engineering expediencies.
